Product Description

Aluminum Alloy Manual Beeswax Foundation Machine Cell size 5.4 or 4.9mm

Description

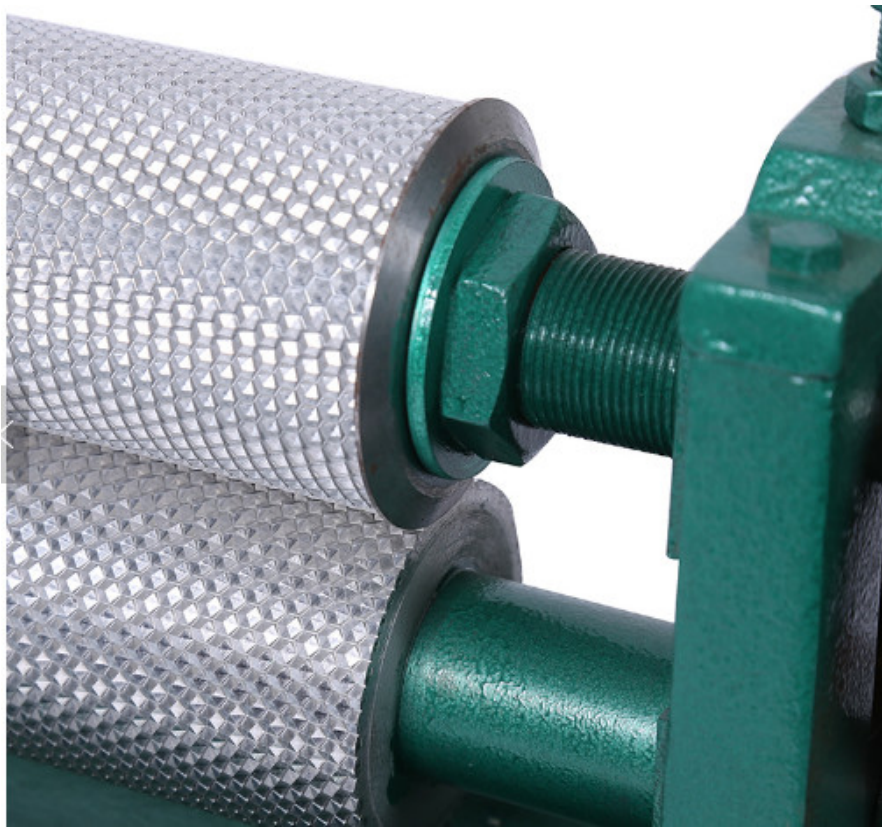

The Manual Beeswax foundation machine is used for embossing the beeswax foundation sheet. Material of beeswax foundation sheet machine is aluminum alloy. Stainless steel is not used to make the beeswax foundation sheet machine, because the stainless steel beeswax foundation sheet machine is too hard to make bee cell on it.

1. Using new numerical control engraving machine, which is special for making beeswax foundation sheet, our roller has a high precision. Compared with the traditional mode, computer engraving functions more standardized, more convenient to create exquisite durable comb pattern.

2. Excellent quality aluminum alloy

Using of numerical control technology brings an absolute boom for comb machine technology. Applied with numerical control engraving machine, our comb machine rollers have more precise and durable cell pattern.

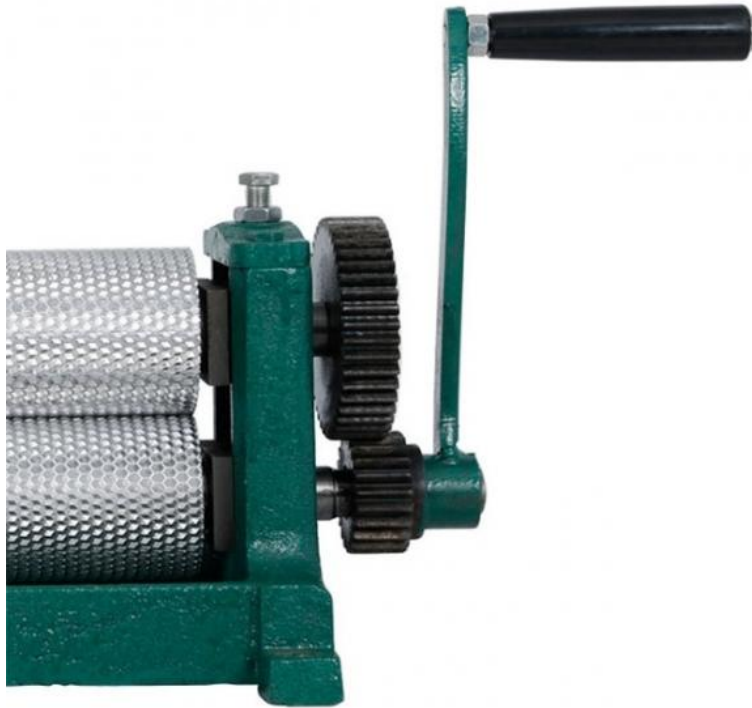

3. Reliable performance of wheel

Wheel-work part is another important part for this machine . There are two timing gears and one speed changing gear . Gear drive has features : reliable performance , compact structure , high precision and efficiency

4. Healthy plastic handle

Our handles are made of high-quality plastic, which is more durable and strong

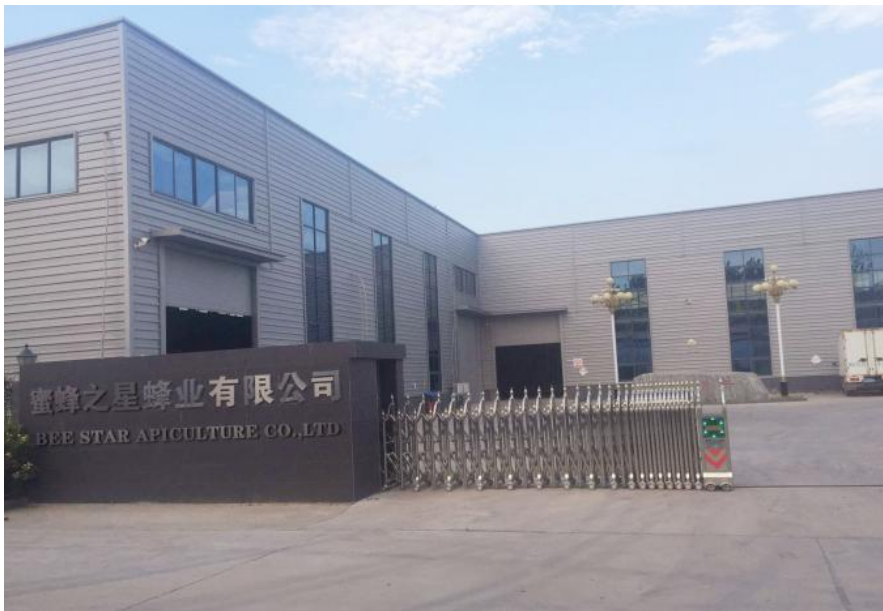

5.Package

Our packaging use of export-type fumigation-free wooden box, with foam packaging inside, it is stronger and safer.

Company Profile

Bee Star---the most professional one-stop beekeeping platform, who is the first beekeeping group company consisting of several beekeeping products factories. For helping our customers to get the best quality, most competitive price and best after-sales service, we insist our everlasting business principle: Be honest and sincere to all customers, only supply great quality beekeeping accessories and 100% pure natural bee products.
