Product Description

Yellow Leather Below Box Bee Hive Equipment , Bee Hive Tool For Beekeepers

Descriptions of Bellow Box:

A **bellows** or **pair of bellows** is a device constructed to furnish a strong blast of [air](#). The simplest type consists of a flexible bag comprising a pair of rigid boards with handles joined by flexible leather sides enclosing an approximately airtight cavity which can be expanded and contracted by operating the handles, and fitted with a [valve](#) allowing air to fill the cavity when expanded, and with a tube through which the air is forced out in a stream when the cavity is compressed.^[1] It has many applications, in particular blowing on a fire to supply it with air.

The term "bellows" is used by extension for a flexible bag whose volume can be changed by compression or expansion, but not used to deliver air. For example, the light-tight (but not airtight) bag allowing the distance between the [lens](#) and [film](#) of a folding photographic camera to be varied is called a [bellows](#).
