Product Description

Natural food Fresh Mixed Pollen Raw Bee Pollen Low Fat for Humans or Bees

Introductions of Bee Pollen:

When bees collect honey, their pollen-carrying feet collect pollen and form pollen clusters, which are stored after entering the hive. Its main therapeutic ingredients are: protein, amino acid, vitamin, bee pollen, trace element, active enzyme, flavonoid compound, lipid, nucleic acid, brassinolide, phytic acid, etc. Among them, the amino acid content and ratio are the closest to the amino acid pattern recommended by the Food and Agriculture Organization of the United Nations (FAO), which is extremely rare in natural foods. Bee pollen is a concentrate of substances with nutritional and medicinal value, which contains proteins, carbohydrates, minerals, vitamins and other active substances. Bee pollen is not only an excellent natural nutritional food, but also an ideal tonic, and has certain medical effects.

Bee pollen comes from nature. It is the pollen grains collected by bees from the stamens of flower plants (nectar source plants and pollen source plants), and mixed with special glandular secretions (nectar and saliva) to form an irregular flat, round shape. Bee pollen has natural health care function and medical and beauty value. It is recognized by more and more people. It is a high-protein and low-fat nutritional health food. Cosmetics", etc., are the treasures of human natural food.
