| About the hat | we have round hat and fencing veil can be choose |

Fireproof Mesh

Ordinary fabric mesh is too soft, easy to fold together during working and affect the field of vision. Therefore, we use high quality fireproof yarn to make mesh, this material can take into account both flexibility and strength, will not easily deform in the process of work. This kind of mesh would greatly facilitate the beekeeping work.

Removable Hat

What will you do if you feel thirsty or hungry when you working? Take off the whole suit just for one sip water or half a hotdog? You don't have to do that. All our bee suits have removable hats, if you feel thirsty or hungry, just unzip the hat and take it off, you will be free to drink or eat anything.

Tightened Sleeves&Legs

Bees are tiny and their flying ways are random, you would never know where these little lives are flying next second. Our bee suits are designed with tightened sleeves and legs specially, to prevent bees flying into your suit by mistake. These suits can protect both you and little bees by this way.

Breathable Fabric

It is not always spring when we keep bees. Do you want to be hot and dehydrated in an airtight bee suit in summer days? Nobody wants it. We use breathable cotton fabric as our bee suit material, it can ventilate and protect you at the same time, making your beekeeping work cooler.
