Beekeeping tools equipment Beekeeping Plastic Bee Foundation Sheet

Products	Plastic beeswax foundation sheets	Langstroth Size	42cm X 20.5cm
Color	Yellow	Cell size	5.4MM
Material	Plastic	Wax	can be sprayed
Storage	stored in a clean, cool and dry area; keep away from strong, direct light.	Shelf Life	2 years when properly stored.

Why choose us ?

1. Better craftsmanship

The plastic foundation sheet which we use are all injection molding processes, and most of them on the market are rotational molding processes. The injection molding process is more accurate than rotational molding, and the solid part is fuller and not easily deformed.

If you buy a plastic foundation sheet made of rotomolding technology, your bees will be dissatisfied when they build the foundation and will be uneven. This will be severely deformed and directly affect the production of honey.

2. Better material

All the plastics we use are new plastics. Many businesses will add recycled plastics. Adding recycled plastics will shorten the use time of this foundation sheet. From another perspective, choosing us will save you money

3. supporting the customization

We are factory direct sales, no middlemen make the difference. We support customization and spray wax on the foundation sheet. This can reduce your workload

The result of using bad one
