## Product Description

### Plastic 5.4mm Yellow Beeswax Foundation Sheets

#### Beeswax Foundation Sheets Introduction

The color of the Beeswax Foundation Sheets produced by the company is dark yellow and transparent with moderate hardness and natural bee fragrance. Beeswax Foundation Sheets adopts a unique formula, which fully combines the physiological characteristics and living habits of bees. It has the excellent quality of "fast comb building, fast spawning, high toughness, and not easy to break in winter and fall in summer". It has been popular for more than 20 years and has been widely accepted by global bee friends.

#### Beeswax Foundation Sheets Parameters

<b>Products</b>	Plastic 5.4mm Yellow Beeswax Foundation Sheets	<b>Langstroth Size</b>	42cm X 20.5cm

<b>Material</b>	Plastic material	<b>Wax</b>	can be sprayed
<b>Storage</b>	stored in a clean, cool and dry area; keep away from strong, direct light.	<b>Shelf Life</b>	2 years when properly stored.

#### Our advantage

##### 1. Better craftsmanship

The plastic foundation sheet which we use are all injection molding processes, and most of them on the market are rotational molding processes. The injection molding process is more accurate than rotational molding, and the solid part is fuller and not easily deformed.

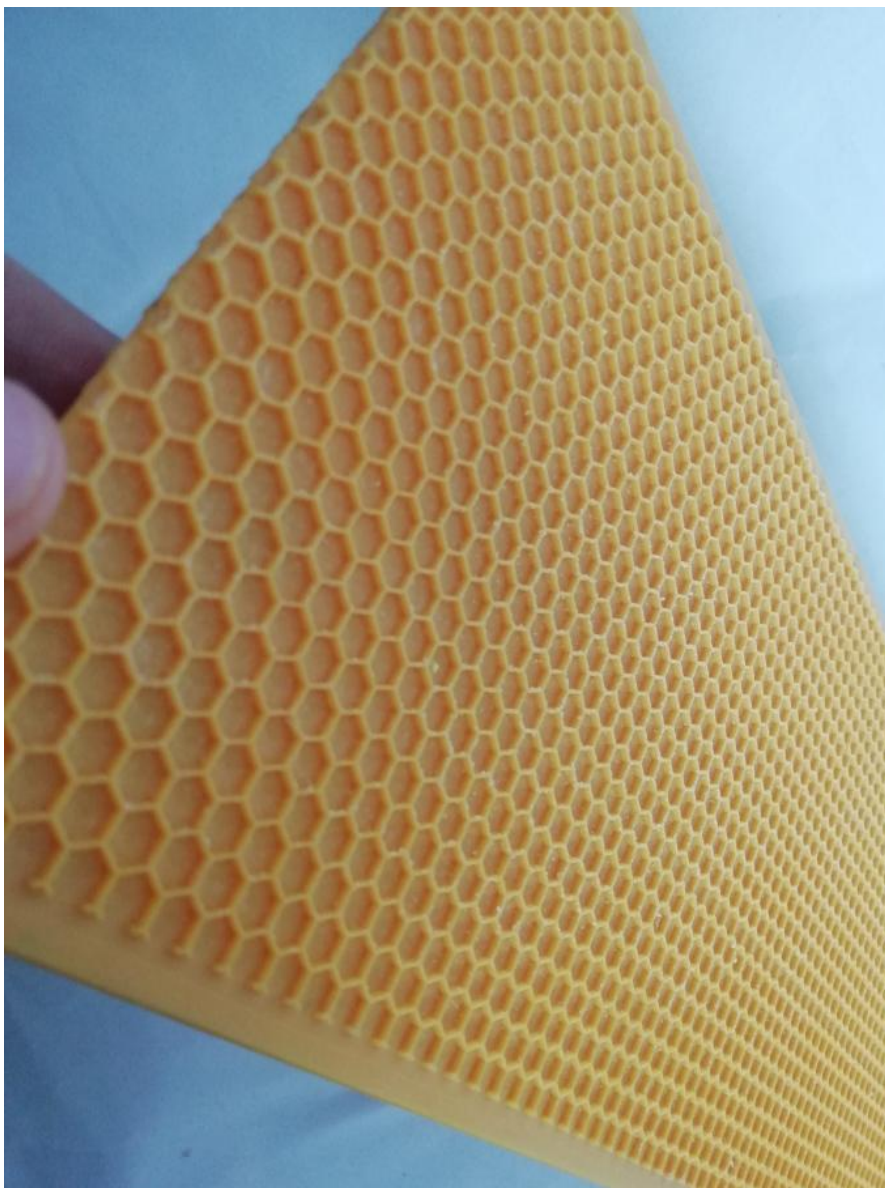

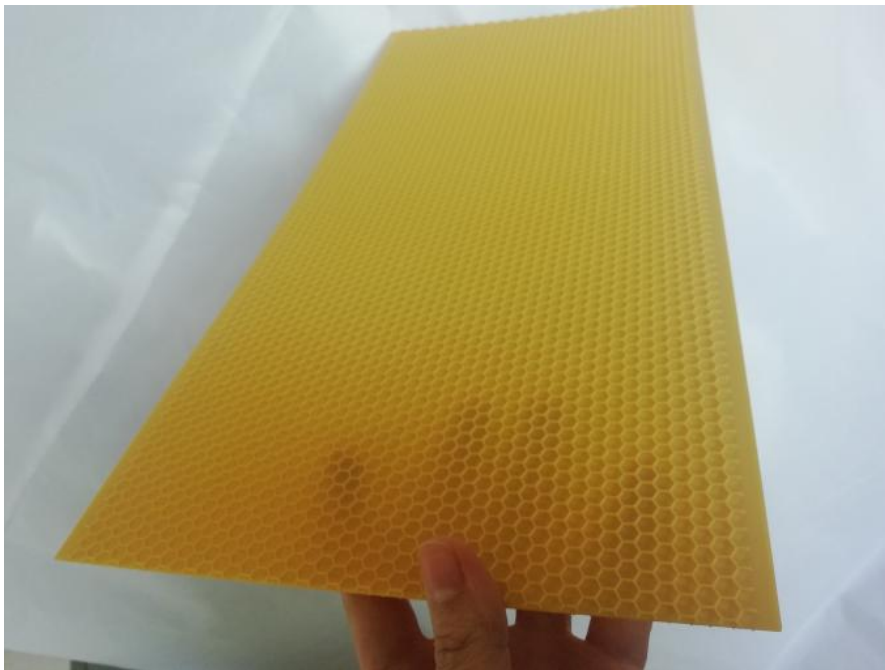

If you buy a plastic foundation sheet made of rotomolding technology, your bees will be dissatisfied when they build the foundation and will be uneven. This will be severely deformed and directly affect the production of honey.

##### 2. Better material

All the plastics we use are new plastics. Many businesses will add recycled plastics. Adding recycled plastics will shorten the use time of this foundation sheet. From another perspective, choosing us will save you money
