Product Description

2 frame bee automatic radial honey processing machine beekeeping electric motor Stainless Steel honey extractor

Our new electric honey slider for Two Waves consists of stainless steel and is therefore very durable. The boiler is 24 inch (61 cm) high and has a diameter of 15 inch (38 cm). The bottom of the sandbox is conically shaped so that the honey can drain to the lockable 5cm outlet. We are proud to be able to offer you these well -built, large honey sliders for two honeycombs at an unbeatable price. The honeysuckle can absorb shallow, medium and deep honeycombs. The metal thread wheels are enclosed so that they remain clean and free of honey. This honey leech is also one of the few on the market whose stock is higher than the ground, which helps to keep it out of the spilled honey. The stainless steel has a beautiful, polished, reflective surface on the outside (is supplied in protective cover that needs to be removed). Made of high -grade 201 stainless steel, this robust, simple, powerful electric honey grinder is exactly what you need for your beehives. This machine picks up two wavers. The steel is flexible, which saves the user time and work. This resilient machine lasts a lifetime.

Features:

2 Waben Electric honeycomb holder with legs /stands. Made of high -grade 201 stainless steel. This electric honeycomb blower is very durable and well built around. Total height including stands is 34 inch /85 cm. The nozzle is 24 inch /61 cm high and has a diameter of 15 inch /38 cm. The Electric Honey Sprayer has two transparent Plexiglas lids t hat keep dirt away while the honey runs. The bottom of the sandbox is conically shaped inside so that the honey can drain to the lockable 5cm outlet Handcrank The mesh of the honeycomb is slightly rounded to the inside to prevent the honeycombs from breaking. Suitable for deep wavelengths of approximately 17 "x 11" (43,2 cm x 28 cm)

Material	201 Stainless Steel
Drum height	24inches /61cm
