Product Description

High Quality Queen Rearing System Queen breeding tool kit Beekeeping Tools for queen bee

Specification

Condition	New
Product name	Queen breeding tool kit
Brand Name	Bee star
Model Number	18HN-36
Applicable Industries	Farms, Beekeeper, Apiculture

Product Description

【Name】 High Quality Queen Rearing System Queen breeding tool kit Beekeeping Tools for queen bee 【Material】 Plastic 【Style】 Jenter Type 【Components】 1 xJenter Comb Box 1 x Jenter Plug Tool 115 x Jenter Brown Cell Plugs 115x Jenter Brown Cell Cups 20 x Jenter Roller Queen Cage 100 X Yellow Plastic Cell Holder(2 bags) 【Function】 The Jenter kit uses a system of plastic cups or 'cells' in which a queen bee can lay her eggs. The cells containing the eggs can then be removed from the laying box and placed into an isolated box for larval development with no direct handling of the larvae. As the first queen bee to hatch will kill rival hatchlings, the eggs are covered with a small plastic cage. This prevents a newly hatched queen from approaching the other eggs, and thus harming them. This allows a beekeeper to return to the hive to find a large number of newly hatched queen bees. Within 30 days, it is possible to rear as many as 50 queens using a single Jenter kit. Challenges with using the Jenter kit range from queens taking several days to decide to use the cups to lay in, to having to carefully observe the eggs and larvae which are hard to see due to the coloration of the cups in the kit.

Company Profile

We are a manufacturer and supplier of beekeeping equipment and bee products from China . Our hot products are bee suit ,gloves , bee smoker, honey extractor ,beeswax foundation sheet , beeswax foundation machine , and bee hive ,frame , hive tools , bee pollen, royal jelly . propolis, and so on . We have factory , we are support the customized . No matter the price or the quality , we have advantage .Please fell free to contact us if you are interested in some of our products.
