Product Description

1.4% 10-HDA Organic Fresh Royal Jelly Queen Bee Acid Royal Jelly Natural Food

100% Natural Fresh Royal Jelly

Royal Jelly is a complicated ingredient bee products. It contains protein,fatty acid, saccharides, vitamin A, vitamin B1, vitamin B2, folic acid, pantothenic acid and inositol.

Royal Jelly chemical component is different because of different bees,age,seasons and staminate plant. Generally speaking,royal jelly contains water,raw protein, carbohydrate,lipid,minerals and some unsure materials.

The process of taking royal jelly:

About Royal Jelly: How do you know the quality?

Good quality royal jelly must meet 4 requirements:

1. The color must be light yellow to yellow. the fresher the color, the lighter yellow it is. But long time transfer without freezing, that will make the color change a little.
2. The taste must be more spicy, stronger plain taste, after that you can feel a little sweet. If no so strong taste but more sweet or plain taste, that might not be of good quality or 100% pure Royal Jelly.
3. The 10-HDA must be at least 1.4%, if lower than this content, that's certainly not a good quality. 1.4% and 1.6% are more popular and natural in Chinese beekeeping farms now.
