## Product Description

### New Product Healthy Fresh Bulk Food Grade Organic Rape Pollen Raw Honey Bee Pollen

Bee pollen is the food of young bees, and its protein content is about 40%. It is considered to be one of the most completely nourished foods in nature. It contains almost all nutrients that human beings need. About half of the proteins exist in the form of free amino acids and can be directly utilized by the body. This highly assimilable protein can significantly meet a person's protein needs.

Bee pollen is rich in natural vitamins and minerals and is highly concentrated. It contains all the nutrients human body needs and is good for our health!

Bee pollen has the following functions: nourishing the body, brain-strengthening agent, promoting children's development, eating cosmetic ingredients and drugs for treating various diseases.
