

8 Frames Electric Honey Extractor With 4 Hinges On The Lid Of The Honey Extractor

Basic Information

- Place of Origin: CHINA
- Brand Name: Bee star
- Model Number: 05DTM-3302
- Minimum Order Quantity: 5pcs
- Price: \$393.19-\$458.73/pcs
- Packaging Details: carton or wooden box
- Delivery Time: 5---30 working day, depending on the order quantity
- Payment Terms: L/C, D/P, T/T, Western Union
- Supply Ability: 1000 pcs per month

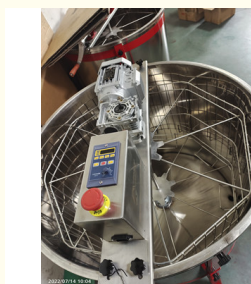

Product Specification

- Features: Automatic Braking Function, SS Honey Gate, 0.8mm Thickness
- Product Name: 8 Frames Electric Honey Extractor
- Material: Manual, 201SS For Barrel +304SS For Inner Basket
- Usage: For Honey Extracting
- Type: Electric
- Frame: 8 Frames
- Highlight: **8 Frames Electric Honey Extractor , 4 Hinges Electric Honey Extractor**

Product Description

8 Frames Electric Honey Extractor With 4 Hinges On The Lid Of The Honey Extractor

Best time for using honey extractor:

For beekeepers, the timing of honey shaking must be grasped. The first time of honey shaking cannot be too early or too late, because too early or too late will bring losses to production. Shaking honey too early makes the time interval between the first and second times too long. Because all the stored honey is shaken out, the queen will quickly expand the spawning circle and compress the honey storage area, affecting the yield of the whole honey flow period; It's too late to shake honey. One is to miss the opportunity to shake honey. The other is to not mobilize the enthusiasm of worker bees to collect honey, and the effect is not good. If the hive is normal, the weather is good, the bees are busy collecting, the eyes of the two corners of the nest spleen begin to be raised with new wax, the honey in the nest is rich, and about half of the cover honey (indicating that the honey is mature), it should start to shake honey.

Features of 8 frames electric honey extractor:

1. Add the 4 hinges on the lid of the honey extractor.
 2. Change the plastic honey gate to stainless steel honey gate and flow honey from the bottom of the honey extractor,
 3. with longer and wider legs two connections ,
 - 4 more sticks of rack of extractor
- Seamless welding for barrel
- 5 stands are strong and not welded, it is fixed by bolt
 - 6 gear and handel are strong and not broken faster

Bulk products

Honey extractor is a powerful tool for modern beekeeping. For beekeepers, when to use honey shaker, it is necessary to correctly judge not only the first time to shake honey, but also the last time to shake honey. Because if you stop shaking honey too early, you will reduce the yield if there is honey. If you stop shaking honey too late, after the honey flow period, the bees will have insufficient honey storage, which will affect the recovery of swarm potential and bring losses to the bees.
