Product Description

White Color Double Thick Winter Sheepskin Bee Gloves For Beekeeping Industries

Specifications:

Size: XXL,XL,L,M,S,XS

Length:100mm

Weight: 180g/pair

Why beekeeping gloves are important ?

1. Your hands are precious and should be protected from stinging. And they will greatly reduce the danger and severity of being.
2. If you wear a bee-keeping glove with extra long gloves and put it on the arm of a bee suit, the bee enters the cuff and gets trapped, and then the stinging wrist does not have any problems.
3. With extra-thick cuffs that are stab-resistant, this means your wrist will not sting. The strong elasticity in the gloves prevents the bees.

Description:

- 1.Sting protection – protect your hands with durable goatskin/leather bee leather gloves and long, thick canvas sleeves.
- 2.Fit and comfortable – these gloves come in a variety of sizes to ensure you get the best fit. If you're not sure which size to buy, please contact us so we can help.
- 3.Arm and sleeve protection – the sleeve extends beyond the elbow and is resilient to ensure the glove stays in place. Extended sleeves provide extra protection for your forearms. Good tightness ensures that your gloves will not slip and ensure good bee tightness.

Our story

1. Quality: We have carried out strict inspection of every part and product.
2. service: Answer the customer's question within 8 hours and service will be on standby 24 hours.
3. Price: Factory direct sales, no middlemen price difference.
4. Experience: The products are exported to dozens of countries in Africa and Southeast Asia.
