Product Description

10-HDA 5.5% Lyophilized Royal Jelly Powder High Purity Latest Date Royal Jelly Product

Royal jelly lyophilized powder is a processed product of royal jelly. It is a powdery substance obtained by drying the refrigerated royal jelly at low temperature. Every 3 kg of royal jelly can only get 1 kg of royal jelly lyophilized powder after processing. However, the royal jelly acid contained in the royal jelly lyophilized powder will not be lost during the processing, so the nutritional value of the royal jelly lyophilized powder is higher than that of natural royal jelly, and its royal jelly acid content is three times that of royal jelly.
