## Product Description

### Natural food Fresh Mixed Pollen Raw Bee Pollen Low Fat for Humans or Bees

#### Introductions of Bee Pollen:

#### Definition and Formation

- Bee pollen is the male reproductive cell of flowering plants, collected by bees from the anthers of flowers and mixed with nectar and bee saliva. Bees carry the pollen grains back to the hive and store them for food. During this process, the pollen grains are further processed and become the bee pollen that we can obtain.

#### Nutritional Composition

- **Proteins and Amino Acids:** Bee pollen is rich in high-quality proteins, accounting for about 20% - 30% of its dry weight. It also contains 22 kinds of amino acids, including 8 essential amino acids that the human body cannot synthesize by itself.
- **Carbohydrates:** It mainly contains sugars such as glucose and fructose, which provide energy for the body. The content of carbohydrates in bee pollen is about 40% - 50%.
- **Fats:** Bee pollen contains a certain amount of fats, mainly unsaturated fatty acids, which are beneficial for maintaining cardiovascular health.
- **Vitamins:** It is rich in various vitamins, such as vitamin A, vitamin C, vitamin E, B vitamins and so on. These vitamins play important roles in maintaining normal physiological functions of the body.
- **Minerals:** Bee pollen is rich in minerals such as calcium, iron, zinc, magnesium and selenium, which are necessary for the normal growth and development of the human body.
- **Bioactive Substances:** It also contains bioactive substances such as flavonoids, carotenoids and enzymes, which have antioxidant, anti-inflammatory and other effects.

Bee pollen comes from nature. It is the pollen grains collected by bees from the stamens of flower plants (nectar source plants and pollen source plants), and mixed with special glandular secretions (nectar and saliva) to form an irregular flat, round shape. Bee pollen has natural health care function and medical and beauty value. It is recognized by more and more people. It is a high-protein and low-fat nutritional health food. Cosmetics", etc., are the treasures of human natural food.
