About 10-HDA

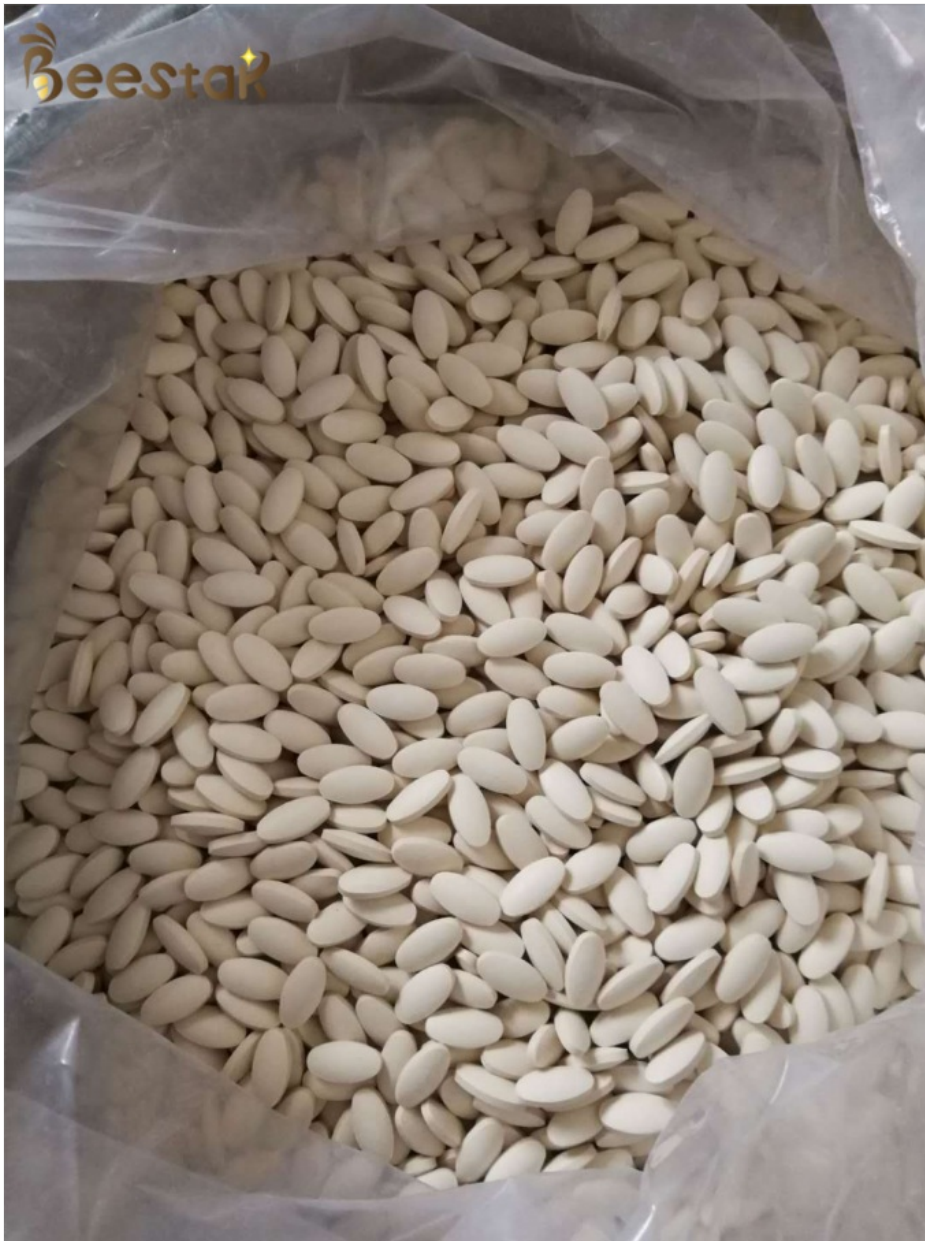

10-Hydroxy-2-decenoic acid (10-HDA) are the unique hydroxy fatty acids found exclusively in Royal Jelly. These compounds possess antibacterial and antimicrobial properties that help strengthen the immune system. The concentration of 10-HDA serves as a key quality indicator for royal jelly, as it is not present in other bee products.

Key Benefits

- Rich source of high-quality protein and essential amino acids
- Provides vital vitamins and minerals
- Supports immune system regulation and enhances resistance
- Helps combat fatigue and improves energy levels
- Powerful antioxidant properties that delay cellular aging

Usage Guidelines

Not a medicinal product: Functions as nutritional support and cannot replace prescribed medications

Recommended dosage: Consume moderately to avoid potential gastrointestinal discomfort

Special precautions: Individuals with bee product allergies, pregnant women, infants, and those with hypotension should consult a physician before use

Storage: Store in sealed containers protected from light and moisture to preserve active ingredients

Company Overview

Based in Sichuan, China since 2016, we specialize in premium bee products including honey, royal jelly, beekeeping equipment, and bee wax. Our products meet international quality standards with comprehensive pre-production and final inspections.
