Product Description

Single Row Fiber Bee Brush with Wood Handle

This professional bee brush is specifically designed for gentle bee handling during beekeeping operations. Crafted with precision and care, it serves as an essential tool for apiarists.

Product Overview

The bee brush is a specialized tool for sweeping bees, primarily used to remove honeycombs, pulping frames, and bees from queen frames. Constructed with high-quality materials including white ponytail and horsehair bristles, this tool features a durable wood handle for comfortable grip and control.

Key Features

- Gentle bristle design prevents harm to bees
- Ergonomic wood handle for comfortable use
- Ideal for removing bees from honeycombs and frames
- Compact size for convenient storage and handling
- Easy to clean and maintain

Proper Usage Instructions

When using the bee brush, first shake off the majority of bees from the honeycomb, then gently brush away remaining bees. For optimal performance and bee safety, regularly wash the bristles with water to maintain softness and prevent hardening that could potentially harm bees.
